1 STEP

THEME INSTALLATION

There are two main methods of installation:

- Magento Connect Manager
- Manually placing the files in the correct location.

If you are using Fresh magento Installation, We'd recommend the Magento Connect Manager method as it's the easiest.

In This Theme we install a two Extensions thus,Magic Cloud Zoom, Easy Tabs. If you already installed any one of the above extensions, we'd recommend the manually placing the files in the correct location.

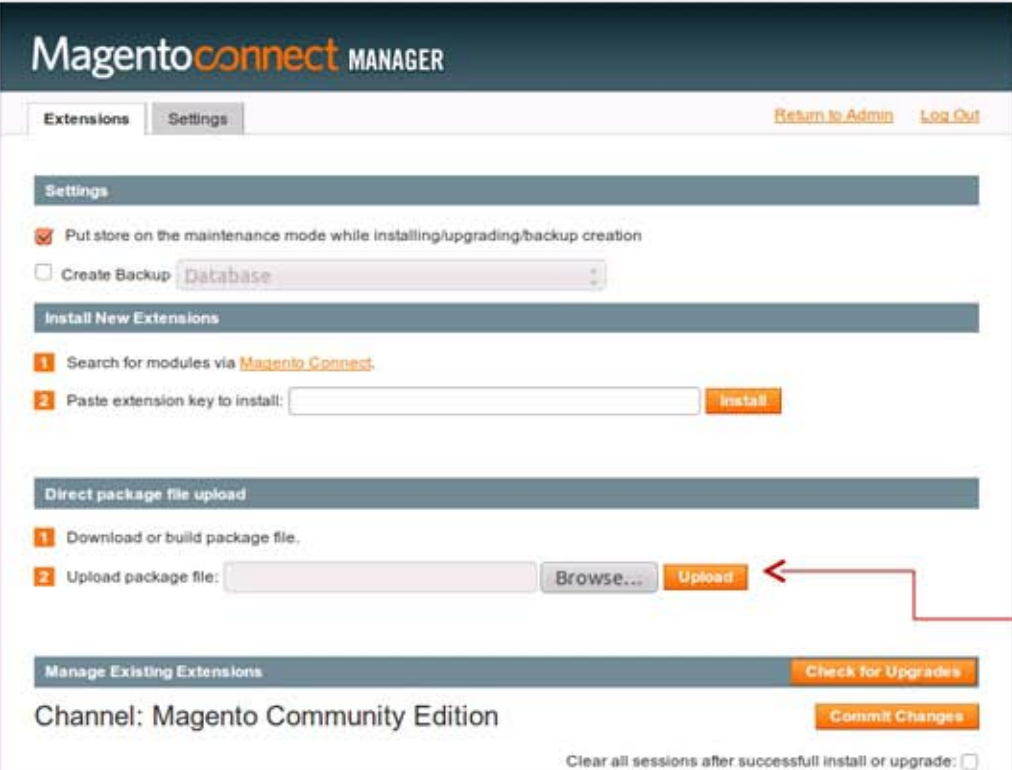

MAGENTO CONNECT MANAGER

Installation via the Magento Connect Manager is as simple as uploading a file.

- Disable Magento Compilation, **System » Tools » Compilation**, click **"Disable"**. If there's no "Disable" button, then it's already disabled!
- Disable the Magento Cache, **System » Cache Management** , disable everything.
- Navigate to the Magento Connect Manager via main administration menu, **System » Magento Connect » Magento Connect Manager**.

1 STEP

- Once you have logged into the Magento Connect Manager, upload our file using the Choose File dialogue under the Direct package file upload section and hit Upload. Magento will now upload and install the package for you.
- After the process have been completed, logout from your

The screenshot shows the 'Magentoconnect MANAGER' interface. The 'Extensions' tab is active. The 'Settings' section includes a checked box for 'Put store on the maintenance mode while installing/upgrading/backup creation' and an unchecked box for 'Create Backup' with a dropdown menu set to 'Database'. The 'Install New Extensions' section has two steps: '1 Search for modules via [Magento Connect](#).' and '2 Paste extension key to install:' with an input field and an 'Install' button. The 'Direct package file upload' section has two steps: '1 Download or build package file.' and '2 Upload package file:' with an input field, a 'Browse...' button, and an 'Upload' button. A red arrow points from the text 'Upload your files' to the 'Upload' button. The 'Manage Existing Extensions' section has a 'Check for Upgrades' button. At the bottom, it says 'Channel: Magento Community Edition' with a 'Commit Changes' button and a checkbox for 'Clear all sessions after successfull install or upgrade:'.

Upload your files

1 STEP

Manual Installation

A manual installation of any Magento Extension should typically be avoided, but instructions are provided here for completeness.

- Unzip the archive
- Move appropriate Files and folders to your magento Folder (ie) app, Media, js, skin files move to correct folders

CONFIGURATION

- Once you set-up the installation you need to apply the theme. In Admin panel **Go to system » configuration.**
- In left column General Tab, click Design link and then choose Themes section Enter your theme name **“home_interior”** in all text fields.
- Then click **“save config”** button.
- Refresh Magento Cache, **System » Cache Management,** Refresh everything.

1 STEP

CHANGE LOGO

- Once you set-up the installation you need to apply the theme. In **Admin panel Go to system » configuration.**

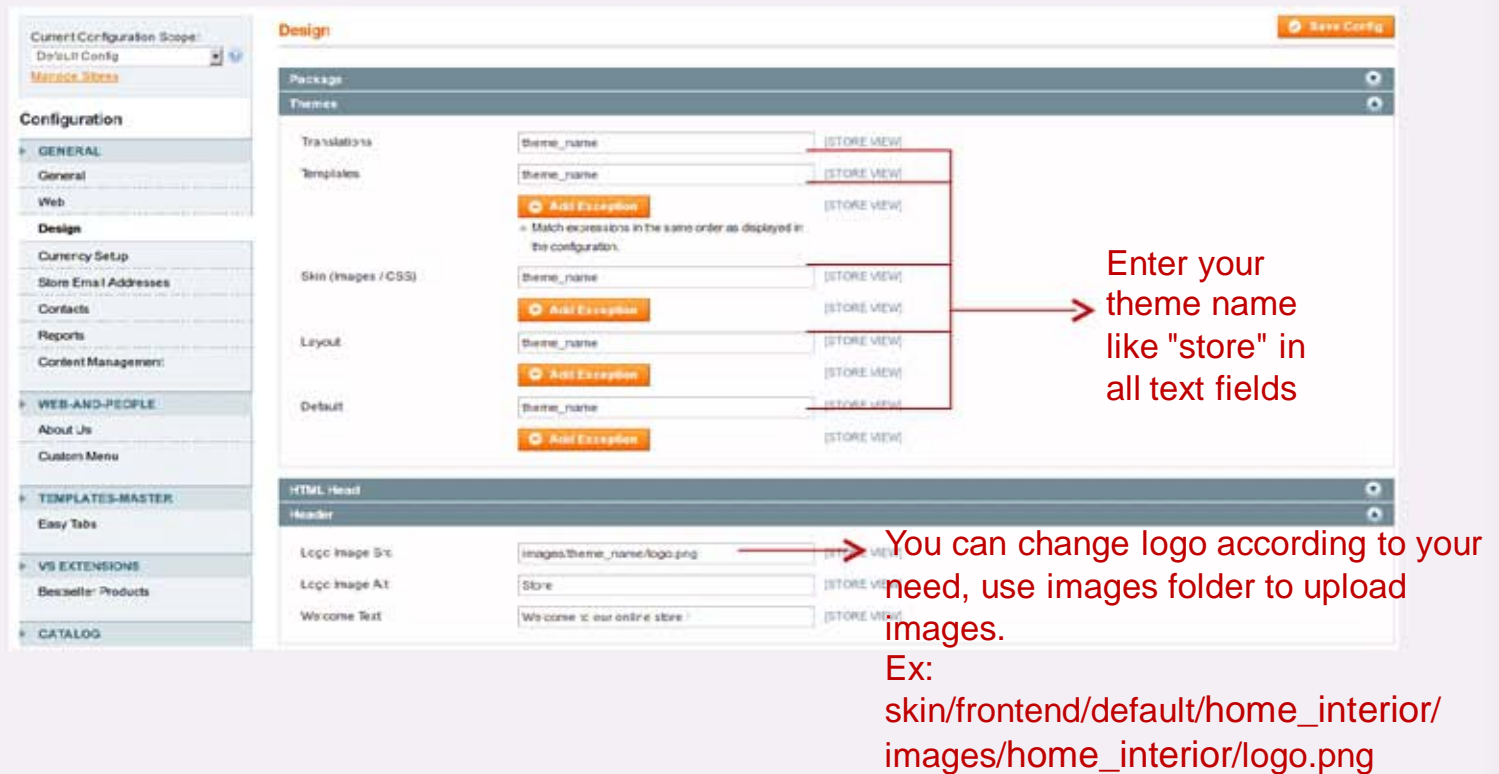

In left column General Tab, click Design link and then choose Header section Logo Image src field add **"images/home_interior/logo.png"**.

- Then click **"save cofig"** button.

Note : you can change logo according to your need, use images folder to upload images.

Ex: skin/frontend/default/home_interior/images/home_interior/logo.png

Here you can change according to your need product-image with, height and zooming image width, height and position. »

WHAT IS CATEGORY ID?

While creating category, Magento automatically creates a special category ID. Use Default Category to create your category

5 STEP

Category id

The screenshot shows the Magento Admin Panel. On the left, the 'Categories' sidebar has buttons for 'Add Root Category' and 'Add Subcategory', a 'Choose Store View' dropdown set to 'All Store Views', and links for 'Collapse All' and 'Expand All'. Below these are category counts: 'Default Category (10)', 'Online Store (10)', and 'sample (2)'. The main content area is titled 'Online Store (ID: 3)' with a red arrow pointing to the 'ID: 3' text. It has tabs for 'General Information', 'Display Settings', 'Custom Design', and 'Category Products'. The 'General Information' tab is active, showing fields for 'Name' (Online Store), 'Is Active' (Yes), and 'URL Key' (online-store). There is a checkbox for 'Create Permanent Redirect for old URL' which is checked.

HTML5 & CSS3

HTML5 and CSS3 bring loads of new features and functionality to the modern web. The audio and visual support in HTML5 is outstanding. As soon as it's fully running and all browsers support HTML5, you will find it easy to add audio and video to websites without the need for outside plugins.

Cascading Style Sheets (CSS) offer increased flexibility in the presentation of website content. CSS3 isn't supported by all browsers yet, it's becoming increasingly popular because it makes these changes so much easier than trying to get the same effect using something like a Javascript plugin or creating slightly different versions of the exact same image.

5 STEP

RESPONSIVE LAYOUT

Responsive Layout is a approach aimed at crafting sites to provide an best viewing experience—easy reading and navigation with a minimum of resizing, panning, and scrolling-across a wide range of devices (from desktop computer monitors to mobile phones)

BOOTSTRAP TECHNIQUE

We use Bootstrap techniques to have responsive layout and compatibility with all major browsers and devices or viewport like desktop, laptop, mobile, ipad, iphone, tab screen. Bsetec is the pioneer in merging Bootstrap techniques with Dolphin themes. It has variable-width layout to customise the site. It offers a pack of stylesheets with basic style definitions for every main HTML component to have uniform, contemporary appearance for tables, text and to form elements. Besides HTML components, Bootstrap includes other regularly used interface components with advanced features.

GOOGLE FONTS

Bsetec embeds Google Web Fonts, as there are around 500 optimised fonts available in the cloud and can be used on the sites so that images scale up well; readable to the screen readers; highlight text; search engines easily read the images; and for faster loading.
